

STUDENT ASSESSMENT SUBMISSION AND DECLARATION

When submitting evidence for assessment, each student must sign a declaration confirming that the work is their own.

Student Name: Mg Kaung Htike San		Assessor name: Ayesha Shariff
Issue date: 13 Feb, 2023	Submission date: 17 Feb, 2023	Submitted on: 17 Feb, 2023
Programme: BTEC Level 5 Higher National Diploma in Computing – Application development RQF		
Unit: Front-end Development		
Assignment title: ABC Learning Centre		

Plagiarism

Plagiarism is a particular form of cheating. Plagiarism must be avoided at all costs and students who break the rules, however innocently, may be penalized. It is your responsibility to ensure that you understand correct referencing practices. As a university level student, you are expected to use appropriate references throughout and keep carefully detailed notes of all your sources of materials for material you have used in your work, including any material downloaded from the Internet. Please consult the relevant unit lecturer or your course tutor if you need any further advice.

Student Declaration

Student declaration

I certify that the assignment submission is entirely my own work and I fully understand the consequences of plagiarism. I understand that making a false declaration is a form of malpractice.

Scenario and Purpose

Purpose of this project
Purpose of this project To demonstrate your capabilities in the following areas: <ul style="list-style-type: none">• Plan a Website & Develop branding, wireframes, information architecture & storyboard.• Develop a website using HTML, CSS & Javascript.• Execute the test cases and validate the website meets the design requirements.
Submission Format
In a zip folder, submit the following: <ol style="list-style-type: none">1. Website screenshot in word document2. Source code
Project Brief & Guidance
Scenario: <p>You have been approached by 'ABC Learning Center' as a website developer to develop a company portfolio website for their institute. 'ABC Learning Center' is an IT Training institute that conducts courses like 'Programming in Java', 'Programming in .Net', 'Microsoft Office', 'HTML' etc. They want to design a website which can be used for providing information about their courses to students.</p> <p>You will be required to design and develop this website using HTML, CSS and JavaScript.</p> <p>You will be required to develop following pages in the website –</p> <ol style="list-style-type: none">1. Common Content<ol style="list-style-type: none">a. Headerb. Footerc. Navigation2. Home Page3. About Us Page / Profile Page4. Contact Us Page (Develop 1 Html page)5. Sitemap Page (Develop 1 HTML page)6. Privacy Policy Page (Develop 1 HTML page) <p>The website that you have developed needs to be tested by you and final sign-off should be taken from 'ABC Learning Center' (Mentor) before hosting it on their web server.</p>

Chapter-1

Information Architecture

Information architecture

The goal of information architecture (IA) is to organize, structure, and classify content in a practical and long-lasting manner. Users are supposed to be assisted in finding information and doing activities. We must comprehend how the parts work together to form the bigger picture and how things interact with one another inside the system in order to do this. Information architecture (IA) is an emerging community of practice with a focus on applying design, architecture, and information science principles to the digital landscape. It is the structural design of shared information environments, the art and science of organizing and labelling websites, intranets, online communities, and software to support usability and findability, and it is. It usually entails a model or notion of information that is used and applied to tasks that demand for explicit information from complicated information systems. Database development and library systems are some of these tasks. Between data management and knowledge management, there is information management. The objective of data management is handling individual data items, such as through the usage of databases. The goal of knowledge management is to extract and disseminate knowledge that exists in people's minds. Process management is separate from information architecture, yet there are frequently beneficial linkages between information and processes, leading to the development of tools like information/process matrices by practitioners. The phrase "information architecture" is used in many different sectors, which makes it challenging to come up with a description that everyone can agree on. Information architecture, for instance, is a part of enterprise architecture in the field of systems design and it deals with the information component when describing the structure of a business.

Advantages of Information Architecture

Your company's vital information may be conveniently stored, found, used, and controlled by organizing it using information architecture.

- Good information architecture is built on the three pillars of foundation, usability, and management.
- IA is a crucial component of user experience (UX) design that organizes information, structures websites and mobile applications, and aids users in navigating them to discover and process the information they require.

- Users are more likely to locate the information they need and spend less time and effort searching for it when the information architecture is well-designed and user-friendly.
- Identifying common properties in material, creating groupings of related information objects, and connecting papers to other documents on the same subject are important information-architecture activities.

Characteristics of Information Architecture

The pillars of effective information architecture (IA) in user experience (UX) are usability, findability, and discoverability. Ever ponder why a stunning website appears to be so nice to the eye? No more enigmas! The art and science of information architecture are responsible for a website's or digital product's final outcome.

Usability

It is important to consider factors such font size, colour, visual proximity, use context, search, error messages, navigation, form design, and labelling when discussing usability. Only a few of these actually relate to information architecture. It gives you a roadmap that shows how content grouping, intuitive control, decision-congestion, recursive pathways, and underutilized regions will be implemented. IA "has a great influence on product design by making it easier for consumers to access vital information," claim the designers.

Findability

The term "findability" refers to how simple it is to find information. It implies that consumers may quickly locate the material or data they presume to be available on a website. No matter if a product is a physical object, a system, or a website, findability is a crucial usability factor. Fundamentally, customers and visitors will just give up on a product or service and search for a better substitute if they can't find what they're looking for. Fundamentally, customers and visitors will just give up on a product or service and search for a better substitute if they can't find what they're looking for. Given this, it is simple to understand why this is such a crucial part of your entire strategic marketing activities.

Discoverability

When it comes to product and interface design, discoverability refers to how quickly a user can locate all of a new system's components and functions when they first use it. That capability is a crucial factor to take into account when designing user interfaces and user experiences for websites, software programs, and hardware. A measure of how readily someone can locate, access, and utilize the parts and functions of a new system is called discoverability, one of the components of learnability. Discoverability may signify a variety of things in various settings.

Chapter 02

Wireframes (9 -10 pages)

Wireframe

In order to arrange content and functionality on a page while taking into account user demands and user journeys, a wireframe is frequently utilized. Before adding visual design and content to a page, the basic framework of the page is established using wireframes early in the development process. In order to arrange content and functionality on a page while taking into account user demands and user journeys, a wireframe is frequently utilized. Before adding visual design and content to a page, the basic framework of the page is established using wireframes early in the development process. The structure of the major pages may be reviewed and changed more quickly and affordably in a wireframe style. A wireframe is a schematic or blueprint that may be used to facilitate communication between you, your programmers, and your designers on the organizational layout of the software or website you're developing.

Advantages of Wireframe

The first actual project procedure is a wireframe. Without any diversion, it transforms the abstract concepts into something concrete.

- Wireframes make it possible for one side to communicate their ideas to another party unambiguously, ensuring that everyone is on the same page.
- A wireframe gives a customer a clear explanation of how these features will work, where they will appear on the particular page, and how valuable they could be in practice.
- When creating wireframes, usability is pushed to the fore in order to highlight page layouts at their core.
- It removes the graphics and colour and concentrates on the essentials, forcing everyone to evaluate a website's usability, conversion rates, link names, location of the navigation and feature placement with objectivity. And everyone benefits from this.
- Wireframing offers a preliminary visual that can be utilized to examine with the customer, which is one of its many benefits. Additionally, users can use it as a kind of early feedback for prototype usability assessments.

Characteristics of Wireframe

- Simple black-and-white layouts called "wireframes" provide the precise dimensions and locations of your website's page components, features, conversion zones, and navigation.
- They lack any colour, font selections, logos, or other design features that would detract from a site's structure.
- However, components like logos, search fields, headers, share buttons, and placeholder text in pseudo-Latin (Lorem Ipsum) are frequently seen in wireframes.
- Additionally, footers, navigation systems, and contact details may be included in high-fidelity wireframes.
- A wireframe is a schematic, a blueprint that may be helpful when thinking through and communicating the structure of the software or website you're producing with your programmers and designers.

Wireframe for ABC Learning Centre

For Home Page

In home page I add navigation bar, description text, background image and social links for footer.

For About Us Page

In about us page, I only add navigation bar, image, about ABC Learning Centre text and social links for footer.

For Contact Us Page

In contact us page, I add navigation bar, contact form, map and social links for footer.

Description

f t l y

For JAVA Schedule Page

In java schedule page, I add navigation bar, table, text and social links for footer.

The screenshot displays a web page template for a Java schedule. At the top, there is a header bar with a back button, forward button, home icon, a refresh icon, a URL input field containing "http://", a menu icon, a search input field with a magnifying glass icon, and a "Search" button. Below the header is a navigation menu with links: Home, About Us, Contact us, Courses, Schedules, SiteMap, and Privacy Policy. The main content area is titled "JAVA" and contains a table with columns: No, Topic, Teacher, Date, and Time. The first row of the table has a pink background, while the subsequent rows have white backgrounds. Below the table, there is a footer section featuring four social media icons: Facebook, Twitter, Snapchat, and Instagram. The entire page is set against a light gray background with a grid pattern.

For HTML Schedule Page

In HTML schedule page, I add navigation bar, table, text and social links for footer.

The diagram illustrates a web page layout for an HTML schedule page. At the top, there is a header bar with various icons and links. Below the header is a main content area containing a table for scheduling courses. The footer at the bottom features social media sharing icons.

Header Bar:

- Icons: back, forward, home, refresh.
- Address bar: http://
- Search bar: Search with magnifying glass icon.
- Links: Home, About Us, Contact us, Courses, Schedules, SiteMap, Privacy Policy.

Main Content Area:

HTML

No	Topic	Teacher	Date	Time

Footer Area:

HTML

Social media icons: Facebook, Twitter, Snapchat, Instagram.

For .NET Schedule Page

In .NET schedule page, I add navigation bar, table, text and social links for footer.

The screenshot shows a web browser window with the following elements:

- Header:** A navigation bar with icons for back, forward, home, and refresh, followed by a URL input field containing "http://", a search input field with a magnifying glass icon, and a "Search" button.
- Menu Bar:** A horizontal menu with links: Home, About Us, Contact us, Courses, Schedules, SiteMap, and Privacy Policy.
- Content Area:** A table titled ".NET" with columns: No, Topic, Teacher, Date, and Time. The first row is highlighted in light brown, while subsequent rows alternate between white and pink.
- Footer:** Social media icons for Facebook, Twitter, Snapchat, and Instagram.

For Microsoft Office Schedule Page

In Microsoft Office schedule page, I add navigation bar, table, text and social links for footer.

The screenshot shows a website interface for 'Microsoft Office'. At the top, there's a header bar with icons for back, forward, home, and refresh, followed by a URL field containing 'http://', a search bar with a magnifying glass icon, and menu links for Home, About Us, Contact us, Courses, Schedules, SiteMap, and Privacy Policy.

The main content area is titled 'Microsoft Office' and features a table with columns labeled 'No', 'Topic', 'Teacher', 'Date', and 'Time'. The table has 10 rows, with the first row having a brown background and the subsequent rows being white. Below the table, there are four social media icons: Facebook, Twitter, LinkedIn, and Instagram.

For Site Map Page

In site map page, I add navigation bar, text and social links for footer.

For Privacy Policy Page

In privacy policy page, I add navigation bar, text and social links for footer.

Chapter 03

Storyboarding

Storyboard

A storyboard serves as the project's plan for the web. It is a straightforward, adaptable tool that may be used to show all of the elements on a single

Web page, including text, photos, banners, navigation, and graphic elements. Storyboards aid in defining the grid and site layout, establishing hierarchy for pieces inside a page, and letting the team know how the final product should appear. A storyboard conveys a narrative using graphics shown in a series of panels that chronologically order the major plot points. It's not necessary to create a complex, high-fidelity storyboard. Your team and stakeholders will remember your message better if you use simple images and a general but detailed scenario.

Advantages of Storyboard

- Storyboards aid in defining the grid and site layout, establishing hierarchy for pieces inside a page, and letting the team know how the final product should appear.
- It can be difficult to design a website from scratch since there are so many factors to consider at each stage of the process.
- As a result, the original vision or essential features of the website may be compromised.
- Storyboards help a production's staff carry out the director's intended goals.
- Storyboarding Enables Us to Visualize Each Production Scene.
- By outlining each scene as it is performed, it saves us time.
- It can also aid in budget management.
- It encourages key stakeholders to buy in early.
- These things are the advantages of storyboard.

Characteristics of Storyboard

- A storyboard divides the action into separate panels and serves as a visual depiction of a film segment.
- It is a collection of sequential drawings that include camera movement, speech, or other important information.
- It illustrates the shot-by-shot flow of a video.
- Title, screen number, proposed graphics or visuals audio and interaction area are general components of storyboard.
- Learning objectives
- A brief description of the course navigation
- A detailed description of how interactions should be designed
- Instructional strategies to guide learners are some levels in creating storyboard.
- The above tips I mentioned are the characteristics of storyboard.

Storyboard for ABC learning Centre

In the following, I connect to each page from home page and also reverse arrow to the home page. It means that the user can go to the pages he wants from navigation bar and get back to the home page also from navigation bar.

Storyboard

Implementation

The process of developing the web in accordance with its design is known as implementation. Hypertext Markup Language (HTML), Common Gateway Interface (CGI) applications, Java scripts, and/or applets are all created by web implementors. Because it requires employing a specific syntax to encode web structures or a programming language in a formal language in computer files, the implementation process is similar to software development. Despite the existence of automated tools to aid in the creation of HTML pages, a solid understanding of HTML expands the web implementor's knowledge.

Implementation of ABC Learning Centre Project

I used vs code as a text editor. With hundreds of languages supported, VS Code makes it easy for you to get started right away and be productive with features like syntax highlighting, bracket matching, auto-indentation, box selection, snippets, and more. We can traverse our code with ease thanks to intuitive keyboard shortcuts, simple modification, and community-contributed keyboard shortcut mappings. I used html, css and java script languages for my project.

- I firstly created the html files and css files.
- Then I looked for the images that are suitable for the project.
- After getting the images that I want, I made some changes to the images according to my website style.
- Then, I looked for the icons and colour theme that look good with my website.
- Then I started writing code.
- I created the following files.

HTML	CSS	Java Script
index.html	Style.css	Script.js
about.html	About.css	

contact.html	Contact.css	
courses.html	Courses.css	
course1.html	Course1.css

How to plan your Java learning?

(with learning map)

Java Brains

Watch on YouTube

Java is a really popular programming language that has been around for over 25+ years. Earning Java Cloud certification helps you achieve more, at a faster pace, with fewer resources by empowering you with the skills that give you an edge over the competition. If you are interested in learning Java, then there are plenty of free online courses to choose from in our ABC Learning Centre.

JAVA Courses Topics

- 1. JAVA Overview
- 2. JAVA-Environment Setup
- 3. Basic Syntax
- 4. Objects & Classes
- 5. Basic Datatypes
- 6. Variable Types
- 7. Modifiers Types
- 8. Basic Operators
- 9. Loop Control
- 10. Decision Making
- 11. Methods
- 12. Classes
- 13. Regular Expressions
- 14. JAVA Files and I/O
- 15. Exceptions etc...

.NET Courses Preview

The .NET framework is one of the most popular development frameworks that provides ease of programming and execution to the users. This software enables you to craft remarkable applications by using various languages such as C#, Visual Basic, and F#.

.NET Courses Topics

1. Introduction to .NET Initiative & .NET Platform
2. Code Management
3. Language Features of C#
4. Language Features of VB.NET
5. Object Oriented Programming Concepts
6. Errors & Exception Handling
7. Assemblies & Application Domains
8. Structured Exception
9. Private Assemblies
10. Assemblies Types
11. JIT & Debugging
12. Control Statements
13. Encapsulation
14. Inheritance
15. Conclusion etc...

MICROSOFT OFFICE Courses Preview

Microsoft Office is the go-to software for organization, communication, or analysis. It is crucial for those working with documents, presentations, payroll clerk, data analysis, or forecasts.

MICROSOFT OFFICE Courses Topics

1. Find your way through long documents with the new Document Navigation pane and Search
2. Line spacing in Word
3. Change the spacing before or after paragraphs
4. Set the default font
5. Open a new document and start typing
6. Apply a heading style
7. Insert clip art
8. Draw a table
9. Update the table of contents
10. Apply Themes to Word Documents
11. Save an existing document as a new document
12. What are PDF and XPS formats?
13. Excel
14. Powerpoint
15. Recover unsaved work etc..

Schedules Page Design

The screenshot displays a website interface with a light blue header bar. In the top left corner, there is a logo consisting of three stacked squares labeled 'A', 'B', and 'C'. To the right of the logo are navigation links: Home, About Us, Contact Us, Courses, Schedules, Site Map, and Privacy Policy.

The main content area features four course schedule cards, each with a pink-to-white gradient background and rounded corners. Each card contains a title, a brief description, and a corresponding icon.

- JAVA**: Description: "By clicking the title above, you can preview the schedule of this course. If you are interested in our course, you can contact us to enroll!!!". Icon: A black silhouette of a steaming coffee cup.
- HTML**: Description: "By clicking the title above, you can preview the schedule of this course. If you are interested in our course, you can contact us to enroll!!!". Icon: A large black stylized letter 'S' inside a square frame.
- .NET**: Description: "By clicking the title above, you can preview the schedule of this course. If you are interested in our course, you can contact us to enroll!!!". Icon: A black rectangular frame with the text ".NET" inside.
- MICROSOFT OFFICE**: Description: "By clicking the title above, you can preview the schedule of this course. If you are interested in our course, you can contact us to enroll!!!". Icon: A black 3D cube icon.

At the bottom of the page, there are social media sharing icons: Instagram, Facebook, YouTube, and Twitter.

schedule1.html and schedule1.css is used for Java schedule page

I connected each schedule page with schedule.css since I used the same design for each schedule.

schedule1.html

```
44  </header>
45

Privacy Policy of ABC

ABC operates the <http://google.com> website, which provides the SERVICE. This page is used to inform website visitors regarding our policies with the collection, use, and disclosure of Personal Information if anyone decided to use our Service, the ABC Training Centre website. If you choose to use our Service, then you agree to the collection and use of information in relation with this policy. The Personal Information that we collect are used for providing and improving the Service. We will not use or share your information with anyone except as described in this Privacy Policy. The terms used in this Privacy Policy have the same meanings as in our Terms and Conditions, which is accessible at <http://google.com>, unless otherwise defined in this Privacy Policy.

Information Collection and Use

For a better experience while using our Service, we may require you to provide us with certain personally identifiable information, including but not limited to your name, phone number, and postal address. The information that we collect will be used to contact or identify you.

Log Data

We want to inform you that whenever you visit our Service, we collect information that your browser sends to us that is called Log Data. This Log Data may include information such as your computer's Internet Protocol ("IP") address, browser version, pages of our Service that you visit, the time and date of your visit, the time spent on those pages, and other statistics.

Cookies

Cookies are files with small amount of data that is commonly used an anonymous unique identifier. These are sent to your browser from the website that you visit and are stored on your computer's hard drive. Our website uses these "cookies" to collect information and to improve our Service. You have the option to either accept or refuse these cookies, and know when a cookie is being sent to your computer. If you choose to refuse our cookies, you may not be able to use some portions of our Service.

Service Providers

We may employ third-party companies and individuals due to the following reasons:
To facilitate our Service;
To provide the Service on our behalf;
To perform Service-related services; or
To assist us in analyzing how our Service is used.
We want to inform our Service users that these third parties have access to your Personal Information. The reason is to perform the tasks assigned to them on our behalf. However, they are obligated not to disclose or use the information for any other purpose.

Security

We value your trust in providing us your Personal Information, thus we are striving to use commercially acceptable means of protecting it. But remember that no method of transmission over the Internet, or method of electronic storage is 100% secure and reliable, and we cannot guarantee its absolute security.

Links to Other Sites

Our Service may contain links to other sites. If you click on a third-party link, you will be directed to that site. Note that these external sites are not operated by us. Therefore, we strongly advise you to review the Privacy Policy of these websites. We have no control over, and assume no responsibility for the content, privacy policies, or practices of any third-party sites or services.

Children's Privacy

Our Services do not address anyone under the age of 13. We do not knowingly collect personal identifiable information from children under 13. In the case we discover that a child under 13 has provided us with personal information, we immediately delete this from our servers. If you are a parent or guardian and you are aware that your child has provided us with personal information, please contact us so that we will be able to do necessary actions.

Changes to This Privacy Policy

We may update our Privacy Policy from time to time. Thus, we advise you to review this page periodically for any changes. We will notify you of any changes by posting the new Privacy Policy on this page. These changes are effective immediately, after they are posted on this page.
Our Privacy Policy was created with the help of the [TermsFeed Privacy Policy template](#).

Contact Us

If you have any questions or suggestions about our Privacy Policy, do not hesitate to contact us.

Testing and Validation

Testing

Web testing is intended to examine every area of the functionality of the online application, including searching for issues with usability, compatibility, security, and overall performance. Web testing is an essential component of building any web application or website since you don't want to invest the time, money, and other resources into establishing this online application just to have it encounter issues as soon as it is released. Making unbiased assessments of how well a system (or technology) satisfies, surpasses, or fails to satisfy stated objectives is the process of testing. Our website's design testing process should never end. To ensure the success of our website, testing enhances the performance, security, and stability of our website. Its applications may also be improved.

Validation

As you enter data, the web server or browser will verify to make sure it is in the right format and complies with any restrictions imposed by the application. Client-side validation is carried out in the browser, whereas server-side validation is carried out on the server. There are 5 types of validations. They are

- data type validation
- Range and constraint validation
- Code and cross-reference validation

- Structured validation and
- Consistency validation

Test the website for functionality, compatibility, usability, performance and responsive

More About Courses

Fig6

The screenshot shows a website with a light blue header. On the left is a logo of three stacked cubes labeled A, B, and C. To the right are navigation links: Home, About Us, Contact Us, Courses, Schedules, Site Map, and Privacy Policy. Below the header is a pink rectangular bar containing the text "More About Courses". The main content area has a light blue background and features a section titled "Privacy Policy of ABC" with a detailed text about personal information collection and use.

Privacy Policy of ABC

ABC operates the <http://google.com> website, which provides the SERVICE. This page is used to inform website visitors regarding our policies with the collection, use, and disclosure of Personal Information if anyone decided to use our Service, the ABC Training Centre website. If you choose to use our Service, then you agree to the collection and use of information in relation with this policy. The Personal Information that we collect are used for providing and improving the Service. We will not use or share your information with anyone except as described in this Privacy Policy. The terms used in this Privacy Policy have the same meanings as in our Terms and Conditions, which is accessible at <http://google.com>, unless otherwise defined in this Privacy Policy.

Information Collection and Use

For a better experience while using our Service, we may require you to provide us with certain personally identifiable information, including but not limited to your name, phone number, and postal address. The information that we collect will be used to contact or identify you.

Fig7

The screenshot shows the same website as Fig6, but with a large black oval drawn around the "Information Collection and Use" section. This section contains the same text as in Fig6, detailing the collection and use of personal information for the service.

Information Collection and Use

For a better experience while using our Service, we may require you to provide us with certain personally identifiable information, including but not limited to your name, phone number, and postal address. The information that we collect will be used to contact or identify you.

Log Data

We want to inform you that whenever you visit our Service, we collect information that your browser sends to us that is called Log Data. This Log Data may include information such as your computer's Internet Protocol ("IP") address, browser version, pages of our Service that you visit, the time and date of your visit, the time spent on those pages, and other statistics.

We want to inform our Service users that these third parties have access to your Personal Information. The reason is to perform the tasks assigned to them on our behalf. However, they are obligated not to disclose or use the information for any other purpose.

Security

We value your trust in providing us your Personal Information, thus we are striving to use commercially acceptable means of protecting it. But remember that no method of transmission over the Internet, or method of electronic storage is 100% secure and reliable, and we cannot guarantee its absolute security.

Links to Other Sites

Our Service may contain links to other sites. If you click on a third-party link, you will be directed to that site. Note that these external sites are not operated by us. Therefore, we strongly advise you to review the Privacy Policy of these websites. We have no control over, and assume no responsibility for the content, privacy policies, or practices of any third-party sites or services.

Children's Privacy

Our Services do not address anyone under the age of 13. We do not knowingly collect personal identifiable information from children under 13. In the case we discover that a child under 13 has provided us with personal information, we immediately delete this from our servers. If you are a parent or guardian and you are aware that your child has provided us with personal information, please contact us so that we will be able to do necessary actions.

Changes to This Privacy Policy

We may update our Privacy Policy from time to time. Thus, we advise you to review this page periodically for any changes. We will notify you of any changes by posting the new Privacy Policy on this page. These changes are effective immediately, after they are posted on this page.
Our Privacy Policy was created with the help of the [TermsFeed Privacy Policy template](#).

Contact Us

If you have any questions or suggestions about our Privacy Policy, do not hesitate to contact us.

Fig5

The screenshot shows the ABC Learning Centre website with a teal header bar. On the left is a logo of three stacked blocks labeled 'A', 'B', and 'C'. To the right are navigation links: Home, About Us, Contact Us, Courses, Schedules, Site Map, and Privacy Policy. The main content area has a light blue background. The title 'Privacy Policy of ABC' is centered at the top. Below it is a detailed paragraph about the service's operation and privacy policy. This is followed by several sections with bold titles: 'Information Collection and Use', 'Log Data', 'Cookies', 'Service Providers', 'Security', 'Links to Other Sites', 'Changes to This Privacy Policy', and 'Contact Us'. Each section contains descriptive text. At the bottom, there is a footer area with social media icons for Instagram, Facebook, YouTube, and Twitter.

Privacy Policy of ABC

ABC operates the <http://google.com> website, which provides the SERVICE. This page is used to inform website visitors regarding our policies with the collection, use, and disclosure of Personal Information if anyone decided to use our Service, the ABC Training Centre website. If you choose to use our Service, then you agree to the collection and use of information in relation with this policy. The Personal Information that we collect are used for providing and Improving the Service. We will not use or share your information with anyone except as described in this Privacy Policy. The terms used in this Privacy Policy have the same meanings as in our Terms and Conditions, which is accessible at <http://google.com>, unless otherwise defined in this Privacy Policy.

Information Collection and Use

For a better experience while using our Service, we may require you to provide us with certain personally identifiable information, including but not limited to your name, phone number, and postal address. The information that we collect will be used to contact or identify you.

Log Data

We want to inform you that whenever you visit our Service, we collect information that your browser sends to us that is called Log Data. This Log Data may include information such as your computer's Internet Protocol ('IP') address, browser version, pages of our Service that you visit, the time and date of your visit, the time spent on those pages, and other statistics.

Cookies

Cookies are files with small amount of data that is commonly used an anonymous unique identifier. These are sent to your browser from the website that you visit and are stored on your computer's hard drive. Our website uses these 'cookies' to collect information and to improve our Service. You have the option to either accept or refuse these cookies, and know when a cookie is being sent to your computer. If you choose to refuse our cookies, you may not be able to use some portions of our Service.

Service Providers

We may employ third-party companies and individuals due to the following reasons:

- To facilitate our Service;
- To provide the Service on our behalf;
- To perform Service-related services; or
- To assist us in analyzing how our Service is used.

We want to inform our Service users that these third parties have access to your Personal Information. The reason is to perform the tasks assigned to them on our behalf. However, they are obligated not to disclose or use the information for any other purpose.

Security

We value your trust in providing us your Personal Information, thus we are striving to use commercially acceptable means of protecting it. But remember that no method of transmission over the internet, or method of electronic storage is 100% secure and reliable, and we cannot guarantee its absolute security.
